GMI	SPG 0673: WEB PROGRAMMING Semester 3 Cyber Security, GMI
Individual Assignment 2	
Date given: **19/9/2025** Due date:**19/9/2025 (12 MIDNIGHT)**	

Instructions:

Multiple Choice Questions (MCQs)

Instructions: Choose the best answer for each question. Each question is worth 1 Mark.

Submission:

1. Word/pdf document that contains:
    a. Web Page screenshot for the **scenario** question.
2. Upload your document to VLU (Assignment 2)

Late submission will be not accepted and will not be tolerated and given 0 (unless with strong reason/excuse).

Name : Abdul Hariz Mohd Sarnudin

Student ID : CBS24070208

Trade/Sem : DCBS 1 / SEM 3

Multiple Choice Questions (MCQs) each question 1 mark:

1. Which of the following best describes PHP?

A) A client-side scripting language

B) A database management system

C) A server-side scripting language executed on the client

D) A server-side scripting language executed on the server

A) $_COOKIE["SESSION_NAME"]

B) $_SERVER["SESSION_NAME"]

C) $_REQUEST["SESSION_NAME"]

D) $_SESSION["SESSION_NAME"]

Scenario Question

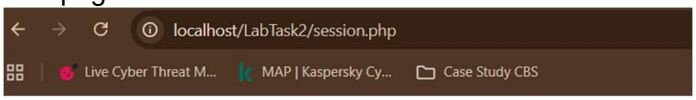

Marks: 10 Marks

Scenario: You are developing a simple PHP script to manage basic user information for a temporary display and session-based access. Your script needs to define a user's full name and a unique identification number. This information will be used to generate a personalized greeting and should be available across different pages the user visits during their current browsing session.

Instructions: Based on the provided PHP Language sources, answer the following questions to outline how you would implement parts of this system.

Answers :
1. D) A server-side scripting language executed on the server
2. C) .php
3. B) ?>
4. C) echo or print
5. C) $
6. C) Create, open, read, write, delete, and close files
7. B) Add, delete, modify data
8. C) // comment
9. B) XAMPP
10. C) Alpha-numeric characters and underscores (a-Z, 0-9, and _)
11. C) $_FILES["FILES_NAME"]
12. C) strlen()
13. C) .
14. C) int
15. D) $_SESSION["SESSION_NAME"]
