Answer all questions.

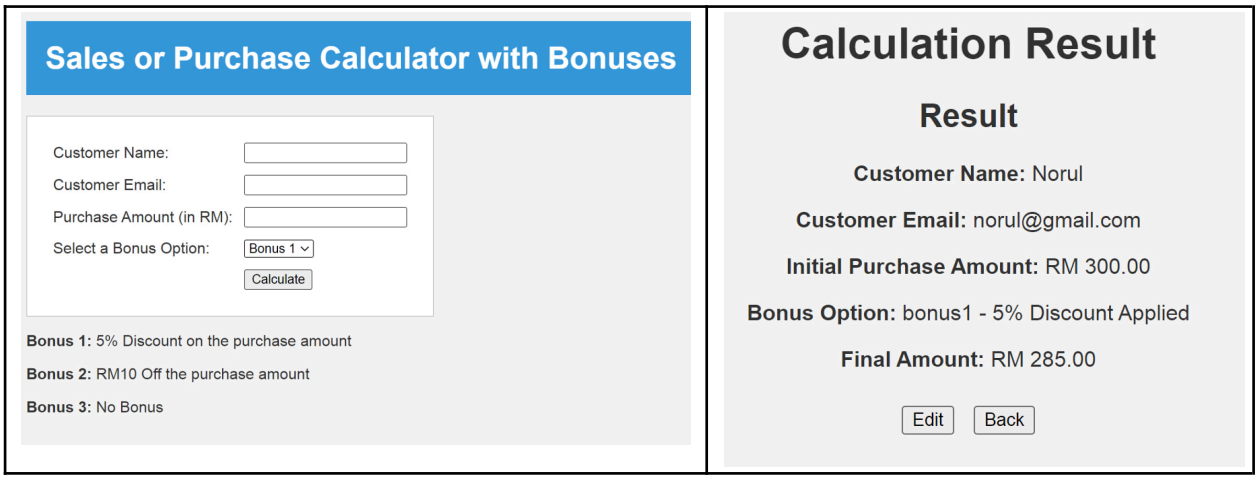

-Write HTML and PHP code to create a web page for a sales or purchase calculator with bonus options.

-The page should display customer details, the initial purchase amount, the selected bonus option, and the final amount after applying the bonus.

-Additionally, include "Back" and "Edit" buttons to allow users to return to the input form for further adjustments or to correct errors, with the edited data being updated in the database.

-You must ensure that the entered data is saved to a database and that any changes made via the "Edit" button are reflected in the database

-You can refer sample output given below:
